BJMP Visitor Admission and Queuing System

Technical Terms and Users Guide

Technical Terms and Users Guide

Document Type: Updated Glossary, Role Guide, and Process Reference

This guide explains the current users, roles, terms, permissions, and process words used in the BJMP Visitor Admission and Queuing System. It was updated to match the newer workflow of masterlist setup, PDL management, visitor registration, verified visitor handling, ID issuance, queue admission, special cases, reports, and account administration.

1. User Roles and Access

User Type	Meaning	Current Typical Access
Staff	Frontline user who handles daily visitor operations based on assigned permissions.	Dashboard, Visitor Registration, Queue, selected Reports, and other actions granted by the permission matrix.
Admin	Operational supervisor who manages records, verification, queueing, ID issuance, and reports.	PDL Management, Visitor Management, ID Issuance, Queue Monitor, Reports, Masterlist, and other approved module actions.
Super Admin	Governance-level user who controls users, permissions, reset approvals, and protected pages.	All modules, Manage Users, permission assignment, reset approvals, and protected pages such as Special Cases.

2. Permission Terms

Term	Meaning
View	Allows a user to open a page, read a table, or inspect a record.
Create	Allows a user to add a new record such as a PDL, queue request, visitor registration, or masterlist item.
Edit	Allows a user to update an existing record, such as PDL information, visitor details, or masterlist values.

Term	Meaning
Delete	Allows a user to remove records that are permitted to be deleted by the module.
Import	Allows a user to upload CSV-based records such as PDL lists or authorized visitor lists.
Export	Allows a user to download report outputs such as Excel or PDF files.
Print	Allows a user to open print layouts such as PVC or A4 ID print views and printable reports.
All	Grants the full set of configured actions for the selected module.

> **Important:** If an action button is hidden, disabled, or missing, the user may not have the required permission. The super admin should review the user role and permission matrix first.

3. Core Record Terms

Term	Simple Explanation
PDL	Person Deprived of Liberty. The detained person or inmate being visited.
PDL Management	The module used to add, edit, import, and maintain PDL records and their linked authorized visitors.
Authorized Visitor	A person linked to a selected PDL and allowed to continue into the registration process.
Verified Visitor	A registered visitor whose record already passed the registration stage and is available in Visitor Management, ID Issuance, and Queue.
Visitor Registration	The process of capturing visitor profile details, photo, emergency contact, valid ID details, and supporting requirements.
Visitor Management	The module used to review verified visitors, inspect documents, edit selected details, ban or lift bans, and route visitors to queue or ID issuance.
Accepted ID	A valid ID type maintained in Masterlist and used when recording the visitor's valid ID document.
Requirement	A document requirement such as Valid ID, Birth Certificate, Marriage Certificate, or Cohabitation Certificate.
Masterlist	The collection of reference lists used by forms and reports, such as Case, Court, Dorm, Relationship, Requirement, and Accepted ID.

Term	Simple Explanation
Dorm	The custodial location or assigned area of a PDL, used in records, queue details, and reports.
Relationship	The visitor's relationship to the PDL, such as spouse, parent, sibling, or other accepted relation.
Emergency Contact	The contact person and contact details recorded for the visitor during registration.

4. ID and Document Terms

Term	Meaning
V-ID	The visitor identification number generated by the system.
QR Code	The scannable code tied to the issued visitor ID and used for queue lookup and admission control.
ID Issuance	The module used to issue or re-issue the visitor's QR-enabled identification card.
Issue ID	The action used when a verified visitor is receiving an ID for the first time.
Re-Issue	The action used when a visitor already had an ID and a replacement card must be generated again.
Print PVC	The print view for card-sized physical PVC output.
Export A4 PDF	The action used to generate a PDF version of the visitor ID in A4 layout.
Issuance History	The record of previous ID issuance and re-issuance actions for a visitor.

5. Queue and Admission Terms

Term	Meaning
Queue	The admission module where a verified visitor is loaded by QR or V-ID and placed into the active waiting line.
Manual Search	The queue option that lets the user type the V-ID or QR token instead of scanning.
Put in Queue	The action used to submit the loaded visitor into the admission queue.
Approve	The action used to accept a waiting visitor and allow time in.

Term	Meaning
Reject	The action used to deny a queue request.
Time In	The recorded timestamp when the visitor is accepted and allowed inside.
Time Out	The recorded timestamp when the visitor leaves and the visit is completed.
Hours Stayed	The readable duration computed between time in and time out.
Queue Board	The visitor-facing display board used for public queue visibility.
Queue Monitor	The admin-facing live monitor showing queue status, waiting count, inside count, completed visits, and rejection-related metrics.
Waiting	A queue request that has been submitted but not yet accepted or rejected.
Inside	A visitor who has already been admitted and has an active visit inside the facility.
Completed	A visitor record with finished time out.

6. Special Case Terms

Term	Meaning
Special Cases	A protected page below Queue in the sidebar, accessible only to super admin.
Add Special Case	The action used to manually encode and approve an exceptional visitor visit.
Approved By	The approving authority name recorded on a special case entry.
Approved Date	The approval date recorded before a special case can proceed.
Special Case Register	The tracking table that shows all special case entries and their queue lifecycle.
Special Case Status	The stage of a special case entry, such as approved, queued, inside, completed, or rejected.

7. Control and Compliance Terms

Term	Meaning
Banned Visitor	A visitor who is blocked from admission because of a recorded violation or administrative reason.
Lift Ban	The action used by an authorized user to remove an active visitor ban.
Ban History	The record of previous visitor bans, the approving or lifting users, and the dates involved.
Pending User	A newly created or newly reviewed user account that still needs approval, role assignment, or permission confirmation.
Password Reset Request	A request submitted by a user who cannot access the account and needs administrator-issued password recovery.
Approve Reset	The admin action that approves a pending password reset request.
Reject Reset	The admin action that declines a pending password reset request.
Permission Matrix	The permission table where super admin grants View, Create, Edit, Delete, Import, Export, Print, and other allowed actions per module.
Activity Log	The stored history of actions such as login, registration, update, approval, export, and deletion events.

8. Queue and Admission Rules

Rule	Meaning
One visit per day	A visitor should not complete multiple visit cycles in the same day using the same identity record unless the workflow explicitly allows otherwise.
Maximum 10 inside	Only ten visitors may be admitted inside at the same time. Another visitor may be approved after a current visitor times out.
Verified records first	Regular queue admissions should come from verified visitor records before queueing is allowed.
Special case is separate	Exceptional visitor handling is no longer created on the regular queue form and must be processed on the Special Cases page.
Ban blocks queueing	A banned visitor should not proceed to normal queueing until the ban is lifted by an authorized action.

9. Reporting Terms

Term	Meaning
Report Source	The category of data being reported, such as Admissions, Registrations, ID Issuance, Banned Visitors, or Special Cases.
Daily Report	Shows records for one selected day.
Monthly Report	Shows records within a selected month and year.
Yearly Report	Shows records within a selected year.
Custom Range	Shows records between a selected start date and end date.
Dorm Filter	Limits report results to one dorm or dorm-related records.
PDL Filter	Limits report results to one selected PDL.
Gender Filter	Limits results by applicable gender field.
Custom Columns	The report fields chosen by the user for display and export.
Custom Headers	User-defined column titles used in the exported report output.
Run Report	The action used to apply filters and generate the report view.
Export Excel	The action used to download the report in spreadsheet format.
PDF Report	The printable or PDF-exportable report output.

10. Process Sequence Terms

Process Word	Current Meaning in the System
Prepare	Set up masterlist references before operational data entry starts.
Encode	Enter details into a form manually.
Import	Upload multiple records through CSV.
Register	Complete the visitor registration workflow so the visitor becomes verified.
Verify	Use the verified visitor record as the operational basis for ID issuance and queueing.

Process Word	Current Meaning in the System
Issue	Create the visitor ID card and QR-linked identity output.
Queue	Submit the visitor for active admission handling.
Admit	Approve the queue request and allow time in.
Complete	Finalize the visit by recording time out.
Report	Filter, generate, and export operational records for review or printing.
