Visitor Admission and Queuing System

User's Manual

This manual provides practical instructions for using the BJMP Visitor Admission and Queuing System. It is intended for staff, administrators, and supervisory personnel who are responsible for visitor processing, queue operations, reporting, and system governance.

1. Accessing the System

1.1 Login Procedure

1. Open the BJMP VAQS login page.
2. Enter the assigned username.
3. Enter the correct password.
4. Select **Sign In** to enter the system.

1.2 Forgot Password Procedure

1. Open the **Forgot Password** page.
2. Enter the username assigned to the account.
3. Submit the password reset request.
4. Wait for administrator approval and the issuance of a replacement password.

2. Main Modules and Their Functions

Module	Function	Typical User
Dashboard	Displays operational overview, summary figures, and shortcuts to key modules.	Staff, Admin, Super Admin
Queue	Handles QR validation, queue admission, acceptance, rejection, and time-out operations.	Staff, Admin
PDL Management	Maintains PDL records, case references, dorm assignment, and authorized visitors.	Admin
Module	**Function**	**Typical User**

Visitor Registration	Registers visitors and uploads photographs and documentary requirements.	Staff, Admin
Visitor Management	Reviews verified visitors, updates files, controls bans, and routes records to queue or ID issuance.	Staff, Admin
ID Issuance	Issues and reissues QR-enabled visitor identification cards.	Staff, Admin
Reports	Generates and exports filtered operational reports.	Staff, Admin
Masterlist	Maintains cases, courts, and dorm references.	Admin, Super Admin
Manage Users	Assigns roles, permissions, and processes password reset approvals.	Super Admin

3. Daily Operating Procedure

3.1 Preparing Records

1. Open the **Masterlist** module from the sidebar.
2. Click the needed tab: **Case**, **Court**, or **Dorm**.
3. Click **Add** if a new reference is needed.
4. Type the required description or reference details.
5. Click **Save**.
6. Use the table search box to confirm that the saved reference is listed.

3.2 Adding a PDL Record

1. Open **PDL Management** from the sidebar.
2. Click **Add New**.
3. Enter the PDL personal information such as name, age, sex, and suffix if available.
4. Select the assigned **Dorm**.
5. Enter the case number, case type, and court information.
6. Add the five (5) authorized visitors provided by the PDL prior to or during commitment.
7. Encode each authorized visitor's available information, such as full name, relationship, address, and contact details.
8. Review the encoded information.
9. Click **Save**.

3.3 Importing a PDL List

1. Open **PDL Management**.
2. Click **Import PDL**.
3. Click **CSV Template** to download the format.
4. Open the file and fill in the PDL details per row.
5. Save the completed file as CSV.
6. Return to the system and click **Choose File**.
7. Select the completed CSV file.
8. Click **Import PDL** to save.

3.4 Adding Visitors to a Specific PDL

1. Open **PDL Management**.
2. Search for the PDL name or PDL ID.
3. If **adding manually**, click the edit button and input the visitor's name, age, sex, contact number, address, and relationship or other required information.
4. If **importing**, download the visitor template, fill it in, choose the completed file, then click **Import Visitors**.
5. Click **Save** or wait for the import success message.
6. Check the visitor list to confirm the visitor is attached to the selected PDL.

3.5 Visitors' Registration

1. Open **Visitor Registration Module**.
2. Click PDL Gender Button tab, Search and select the PDL.
3. Then click **Load Visitors** Button, to load the authorized visitors list on the table.
4. Click **Start Registration** on the row of the visitors you want to register.
5. **Upload** or **capture** the visitor photo.
6. Input emergency contact information, then click **Confirm & Continue**.
7. **Upload and Review** Required Documents.
8. Click **Submit Registration**.

3.6 Managing Verified Visitor

1. Open **Visitor Management**.
2. Use the search box to find the visitor.
3. Click **Details** button to view visitors' full information, including photo and documents uploaded.
    - To change visitor photo, click **Change Photo** button, then select new photo.
    - To update or replace uploaded documents, select the tab of the specific document to preview it, then click the **Change File** button.
    - To update emergency contact information, click the edit button, provide new

information, then click **Save Emergency Contact** button.

4. Click **Edit** if personal details need correction, go to PDL Management Module and search for the pdl, then click edit button to update the visitors' details.
5. To include the visitor in the queue, click the **Queue** button to be redirected to the queuing admission process.
6. To Ban visitor, click the **Ban** button and input violation and effective date until, then click save.
7. To Lift ban, click the **Lift** button, input the reason for lifting, then click **Confirm Lift** button to save.
8. To view ban history, click the **Ban History** button, to view banning history details.
9. To view pdl details, click the **PDL Details** button, to view details.

3.7 ID Issuance

1. Open **ID Issuance**.
2. Select PDL from the PDL table.
3. Wait for the authorized visitors table to view.
4. Select the visitor who needs an ID.
5. Click **Issue ID**.
6. If the visitor already has an ID and needs replacement, click **Re-Issue**.
7. To update the signatory details, change it directly to the textbox.
8. Click **Print PVC** for card printing or **PDF** to export the ID.
9. Used Zoom Controls to Zoom in and out or reset the Preview Stage.

3.8 Queue Admission

1. Open **Queue** Module.
2. Scan the visitor's QR code on the ID or upload the QR code.
3. For special cases, click the **Special Case** button, provide the necessary details, then click **Approve Special Case** to save.
   Note: For authorized personnel only.
4. Review the visitor details displayed on the screen.
5. Click **Put in Queue**.
6. *Optional:* If a Valid ID card is required, select the ID type and enter the ID number; otherwise, skip this step.
7. In the request table, click **Accept** to allow the visitor entry or **Reject** to deny the request.
8. Click **Time Out** once the visit is completed or use QR code scanning to process the time-out.

    - For visitors' transparency: click **Visitor Board** button, to display queue details, such as:
    - *For Admin and Super Admin only:* click **Admin Monitor** button, to monitor queueing and admission daily process.

3.9 Managing Activity Logs

1. Click Logs button.
2. Use filter options to filter records.
3. To manage log deletion, check the Log Cleanup Controls and select the deletion options you want to apply.

> **Important:** The system allows only one visit per visitor per day and only ten visitors inside the facility at one time.

4 Reporting Procedure

1. Open the Reports module.
2. Change report title, select the report source: `Visitor` Admissions, `Visitor` Registrations, ID Issuance, Ban Visitor Records, Special Case Visits Records.
3. Select the desired period type: Daily, Monthly, Yearly, or Custom Range.
4. Apply the filters.
5. Then click **Show Report** button.
6. Arrange columns by dragging them into order and rename headers.
7. Review the report table information, then click Export to Excel.

5 Permission Guidance

Action buttons and backend functions are permission-controlled. Users must be granted the required permission before they can open or use a function. Super admin is responsible for assigning these permissions in the Manage Users module.

Technical Terms and Users Guide

Glossary, Role Guide, and Permission Reference

This document explains the terms, users, roles, and permission concepts used in the BJMP Visitor Admission and Queuing System. Use this document as a reference when a system term or role needs clarification.

1. User Roles

User Type	Meaning	Typical Access
Staff	Frontline user who assists with visitor registration, QR scanning, queue intake, and basic daily operations.	Dashboard, Visitor Registration, Queue, selected Reports, and other modules granted by permission.
Admin	Operational supervisor who manages PDL records, visitor records, ID issuance, queue monitoring, reports, and exceptions.	PDL Management, Visitor Management, ID Issuance, Queue Monitor, Reports, Masterlist, and approved action buttons.
Super Admin	System governance user who controls accounts, roles, permissions, password reset approvals, and high-risk actions.	All modules, Manage Users, permission matrix, user approval, and administrative controls.

2. Permission Terms

Term	Meaning
View	Allow the user to open and read a module or record.
Create	Allows the user to add a new record, such as PDL, visitor, masterlist item, or queue entry.
Term	**Meaning**
Edit	Allows the user to update an existing record.
Delete	Allows the user to permanently remove or delete records.
Import	Allows the user to upload records using a CSV template.
Export	Allows the user to download reports or data files such as Excel or PDF.

Print	Allows the user to open print layouts or print generated documents.
All	Grants all available actions for the selected module.

> **Important:** If a button is missing or disabled, the user may not have permission for that action. The super admin must review the user's role and permission matrix.

3. System Terms

Term	Simple Explanation
PDL	Person Deprived of Liberty. The detainee/inmate being visited.
Visitor	A registered person allowed to visit a specific PDL.
Authorized Visitor	A visitor linked to a PDL and required to proceed through registration, ID issuance, or queue processing.
Visitor Registration	The process of encoding visitor information, photo, documents, and emergency contact details.
Visitor Management	The module used to review, edit, verify, ban, or update visitor records.
Masterlist	Reference lists used by the system, such as cases, courts, and dorms.
Dorm	The dormitory represents the designated housing or assignment area of a PDL.
QR Code	A secure scannable code printed on the visitor ID and used for queue validation.
V-ID	The visitor identification number generated by the system.
ID Issuance	The module used to generate, print, or re-issue QR-enabled visitor ID cards.
PVC Printing	Printing the visitor ID in actual card size for PVC card output.
Term	**Simple Explanation**
Queue	The admission module where scanned visitors are placed before being accepted inside.
Queue Board	A visitor-facing display showing waiting or admitted visitors for public viewing.

Queue Monitor	An admin live monitoring page showing waiting, inside, completed, and rejected admissions.
Time In	The timestamp when the visitor is accepted and allowed inside.
Time Out	The timestamp when the visitor leaves and the visit is completed.
Hours Stayed	The readable duration between time in and time out, such as 1 hr 3 mins.
Special Case	A controlled admission record for visitors approved even when normal ID requirements are not complete.
Banned Visitor	A visitor restricted from admission due to violation or administrative reason.
Lifted Ban	A previously banned visitor whose restriction was removed by an authorized user with a recorded reason.
Report Source	The type of report being generated, such as Admissions, Banned Records, Special Cases, ID Issuance, or PDL visits.
Custom Columns	Report fields selected by the user for Excel, PDF, or print output.

4. Queue and Admission Rules

Rule	Meaning
One visit per day	A visitor ID can only be used for one completed or active visit per day.
Maximum 10 inside	Only ten visitors may be accepted inside at the same time. Another visitor can be accepted after someone times out.
Daily queue reset	The queue board and request table should show current-day admission activity only.
Optional ID in queue	ID type and ID number may be skipped if the process allows it or if a special case approval is used.
Banned visitor control	Banned visitors cannot proceed unless an authorized user lifts the ban and records the reason.

5. Report Terms

Term	Meaning
Daily Report	Show records for one selected date.
Monthly Report	Shows records within a selected month and year.
Yearly Report	Shows records within a selected year.
Custom Range	Shows records between selected start and end dates.
Dorm Filter	Limits report results to one dorm or dorm description.
Gender Filter	Limits report results by visitor or PDL gender where applicable.
PDL Filter	Shows visits and visitors connected to a selected PDL.
Column Arrangement	The drag-and-drop order of fields in the final export report.
Report Title	The custom title shown on the report printout, PDF, or export.

6. User Account Terms

Term	Meaning
Account Registration	The process where a new system user requests or creates an account.
Pending User	A user account that still needs approval or permission assignment.
Password Reset Request	A request submitted by a user who forgot their password.
Permission Matrix	The table where super admin grants module actions such as View, Create, Edit, Delete, Import, Export, and Print.
Audit Log	A recorded history of user activity, such as login, edits, deletions, exports, or permission changes.
