BJMP VAQS System Flowchart

End-to-end flow for visitor admission, ID issuance, queueing, reporting, and governance

Daily queue controls: one visit per visitor per day, max 10 visitors inside at a time, daily board reset

01

Authentication

Login, registration, forgot password request, and password reset approval.

02

Masterlist Setup

Cases, courts, and dorm references are maintained for standardized downstream records.

03

PDL Management

Create/import PDL records, maintain dorm/case details, and manage authorized visitors.

04

Visitor Registration

Register authorized visitor details, photo, documents, and emergency contact against a PDL.

05

Visitor Management

Review verified visitors, update files/photos, apply bans, lift bans, and prepare next action.

06A

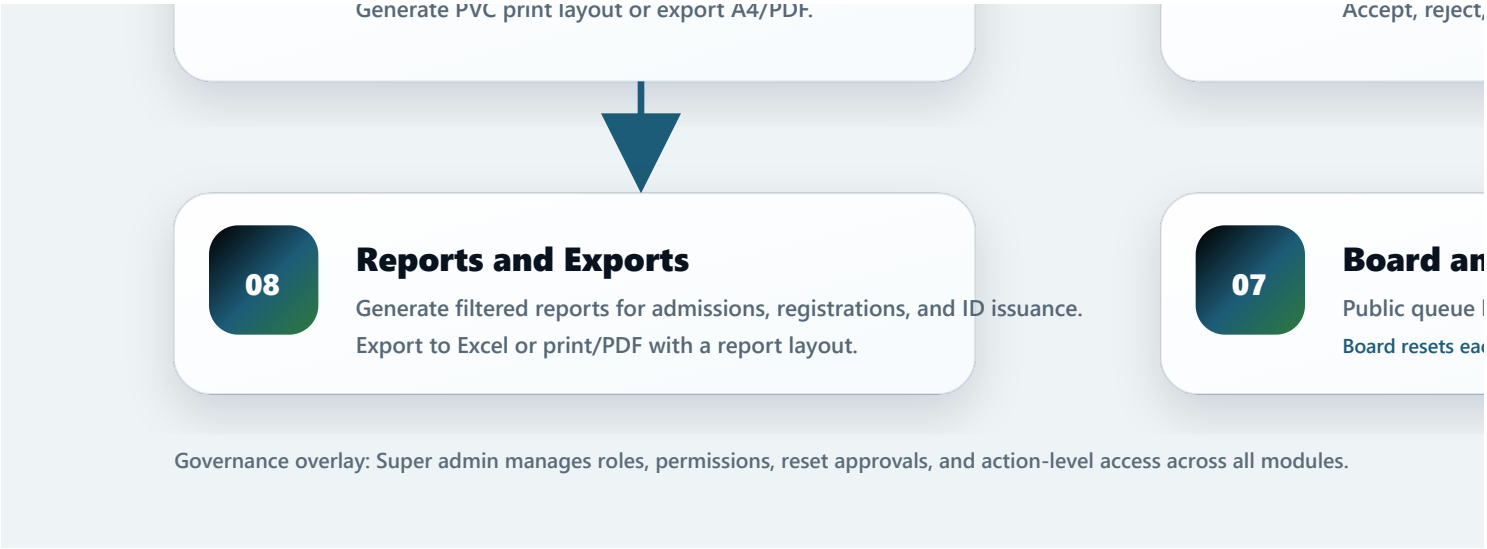

ID Issuance

Issue or reissue QR-secured visitor IDs.
