JONALYN ESPARTERO

Programmer / Web Developer

Southville 8B, San Isidro, Rodriguez, Rizal, Philippines
+63 970 3475 419 · jonalyn.espartero4320@gmail.com

PROFESSIONAL SUMMARY

IT professional with experience in web development, technical support, system deployment, and client relations in government and private organizations. Skilled in back-end programming, troubleshooting, database management, and user documentation. Uses AI tools to support creative development and productivity, with careful review of results. Willing to learn, receive training, and apply feedback, with a commitment to research and effective teamwork.

PROFESSIONAL EXPERIENCE

Programmer / Web Developer

Local Government Unit of Mandaluyong | August 2024–Present

- Deploy, configure, and maintain information systems to support reliable government operations.
- Enhance back-end code, troubleshoot system issues, and maintain application functionality.
- Provide technical assistance and develop user manuals to help staff use systems effectively.

Sales Associate

Microgenesis Business System | March 2024–August 2024

- Managed client accounts, account mapping, sales reports, and sales activity records using Salesforce CRM.
- Conducted telemarketing, prepared quotations, and presented products to prospective clients.
- Monitored service delivery and resolved customer concerns in coordination with internal teams.

Technical Intern → Technical Support / Programmer

Lexsys Technologies Incorporated | March 2023–January 2024

- Created user manuals and system documentation during the technical internship.
- Progressed to technical support, deploying systems, troubleshooting issues, and assisting LGU users.
- Later handled back-end code enhancements and system maintenance to improve functionality and performance.
